

BLB&G Achieves Top Plaintiff Law Firm Rankings in Latest ISS SCAS "Top 50" Report

March 2, 2023

BLB&G once again achieved a top ranking among firms representing investors in securities litigation, according to data compiled by ISS Securities Class Action Services (SCAS) in its "Top 50" report. The firm's ranking reflects its recovery of more than \$920 million for investors, and the fact that it recovered more money in fewer cases than any other firm. The \$920 million in recoveries cited by ISS SCAS is limited to securities class actions and does not include the more than \$2 billion that BLB&G recovered for investors in direct litigation in 2022.

The ISS SCAS "Top 50" report follows the publication's recent release of its *Top 100 U.S. Class Action Settlements of All Time* report, which showed that — for the thirteenth consecutive year — BLB&G was lead or co-lead counsel in more top recoveries than any other firm. By prosecuting 36 of the top 100 U.S. securities fraud settlements, BLB&G has recovered over \$26 billion for shareholders: nearly \$8 billion more than the nearest peer firm. BLB&G is proud to have recovered more than \$37 billion for investors in its 40-year history of representing institutional investors.

We are humbled that the 2022 ISS rankings once again recognize the hard work and commitment we as a firm strive to achieve in each and every one of our cases. Our success and results would not be possible without the confidence and active role of our clients — we are honored by their trust and recognition of BLB&G's litigation skills and tenacity.”
